

The DM Sales Script Guide

5 Copy-Paste Messages That Turn "How Much?" Into Bank Transfers (For Physical Products & High-Ticket Services)

By Itoya David | Founder, SCALE GROUP Execution Series

The Universal DM Problem: Whether you sell **physical products** (fashion, gadgets, skincare, hair, food) or **high-ticket services** (freelancing, consulting, agency work), 80% of sales die in direct messages because of one mistake: *replying with a raw price tag in your very first message.*

When you state a price upfront without context, buyers compare your price tag to their bank balance — rather than the value, quality, or solution you offer. Below are **dual-track scripts** customized for both ■ **Physical Product Sellers** and ■ **High-Ticket Service Providers**.

SCRIPT 1: The Quick Need-Qualification Opening

Goal: Opens an engaging conversation and matches the exact right option before stating price.

■ TRACK A: Physical Products & Commodities (Fashion, Gadgets, Skincare, Hair, Food)

"Hey [Name]! Glad you love this piece! Are you buying this for daily use or for a special occasion coming up (e.g. wedding/photoshoot/event)? I want to make sure I recommend the exact right size/bundle for you!"

■ TRACK B: High-Ticket Services & Consulting (Agencies, Freelancers, Services)

"Glad you reached out, [Name]! Before we discuss pricing, what is your primary revenue or growth goal for this month? (I want to ensure we're built for what you actually need right now)."

■ **EXECUTION STRATEGY:** For products, asking about their event/usage establishes personal connection and lets you recommend matching accessories or bundles.

SCRIPT 2: The Value-Anchor & Bundle Presentation

Goal: Anchors extra value (free delivery, care kits, warranties, bonus options) before stating the cost.

■ TRACK A: Physical Products & Commodities (Fashion, Gadgets, Skincare, Hair, Food)

"Our [Product Name] is made with premium [Material/Quality Grade] that lasts 3+ years without fading. The single piece is ■15,000, but our 3-Piece Combo Bundle is ■35,000 (saves ■10,000 + includes Free Doorstep Delivery). Which option would you like me to prepare for you?"

■ TRACK B: High-Ticket Services & Consulting (Agencies, Freelancers, Services)

"Our clients typically see a 3x to 5x return on investment within 30 days. Are you looking for complete done-for-you execution, or step-by-step implementation guidance?"

■ **EXECUTION STRATEGY:** For commodities, framing price as a choice between Single vs Discounted Bundle increases your Average Order Value (AOV) by 35%.

SCRIPT 3: The 'Is That Last Price?' Objection Neutralizer

Goal: Overcomes price resistance and haggling without cutting your margin.

■ TRACK A: Physical Products & Commodities (Fashion, Gadgets, Skincare, Hair, Food)

"I completely understand! Because of our high quality [Material/Import Standard], we don't cut corners on production. However, if you order today before 4 PM, I can include a complimentary [Bonus Care Kit / Free Nationwide Delivery] to save you money!"

■ TRACK B: High-Ticket Services & Consulting (Agencies, Freelancers, Services)

"I completely understand, [Name]. Compared to doing nothing and continuing to lose revenue every week, this is a fraction of the cost. If budget is tight, we can split this into 2 structured payments so you start generating results this week."

■ **EXECUTION STRATEGY:** Never just discount cash off your price. Instead, add bonus perceived value (free gift, free shipping, or split payments) to protect your profit margin.

SCRIPT 4: The Stock Availability Re-Engagement Trigger

Goal: Revives buyers who asked for price and stopped replying (ghosted).

■ TRACK A: Physical Products & Commodities (Fashion, Gadgets, Skincare, Hair, Food)

"Hey [Name]! Quick update — we have only 2 pieces left of the [Size/Color] in current stock before our next shipment next month. Would you like me to reserve one for you before it sells out?"

■ TRACK B: High-Ticket Services & Consulting (Agencies, Freelancers, Services)

"Hey [Name], I'm finalizing our client schedule for this week and have 1 slot remaining. Should I hold it for you, or did you decide to pause this project for now?"

■ **EXECUTION STRATEGY:** Genuine stock scarcity (limited quantities/sizes) gives ghosted shoppers a logical reason to complete their purchase immediately.

SCRIPT 5: The Assumptive Bank Transfer Close

Goal: Transitions smoothly from customer agreement to payment & address confirmation.

■ TRACK A: Physical Products & Commodities (Fashion, Gadgets, Skincare, Hair, Food)

"Awesome! Please drop your Full Name, Phone Number, and Delivery Address here. Once sent, tap here to complete transfer: [Paystack Link / Bank Details]. We ship out immediately upon receipt!"

■ TRACK B: High-Ticket Services & Consulting (Agencies, Freelancers, Services)

"Awesome! You can complete your deposit here: [Paystack Link / Bank Details]. Once done, reply with your payment screenshot and I'll send over your instant onboarding access immediately."

■ **EXECUTION STRATEGY:** Give a clear 2-step directive: (1) Send Delivery Details \$ ightarrow\$ (2) Complete Transfer. Structured instructions speed up checkout completion.
